

Update (Oct 16)

At this point all the targeting, following, provoking, and intimidation has increased but it's illegal to record and publish without consent. On the other hand the use of surveillance and whatever else there emitting into my apartment is not see below more verifiable evidence.

My cell phone has been struggling with signal it just fluctuates one moment great signal then suddenly it drops.

When I saw the signal drop on my phone I placed it on the table next to the EMF meter. See video how it sits at 1-2 bars and the meter keeps detecting RF spikes in the air.

Then about 10 min later it jumped back to full strength and I ran the same test and it was stable

(Side Note) Alarming that they seem to have the ability to Jam my phone how I communicate.

(Engineering Note) The phone likely runs on averaging the signal strength over a period of time. That's why the spike happens and it drops to one bar slightly after, a moving average in the phones software would generate this.

The reality that these people can do this at will and there is at the moment nothing I can do to stop it is difficult. Counting on my Tax dollars.
